Planning Document - Brainstorming a New Website Idea

Website Concept

Construction/Building Company Website (Build, Rent & Sell)

Identifying the products or services being offered

The website will represent a building and property development company that offers three main services:

- Construction of residential and commercial buildings
- Selling newly built properties
- Renting properties to long-term and short-term tenants

The company acts as both a developer and property manager, providing clients with a complete service from construction to ownership or rental, the website will reflect this.

Identifying the aim of the website, and how it differs from existing ones

The main aim of the website is to:

- Clearly separate the three user goals: build, buy, and rent
- Make it easy for users to quickly find the information relevant to them
- Present properties and services in a clean, professional, and user-friendly way

Many existing building company websites feel cluttered or overwhelming, with too much information presented at once.

This website will differ by:

- Using clear navigation and visual hierarchy
- Organising content based on user intent

- Focusing on simplicity, clarity, and trust

Target Audience

1. Property Buyers (ages 25–55)
    - Individuals or families looking to purchase a home
    - They need clear property details, pricing, and contact options
    - They value trust, professionalism, and visual clarity
2. Property Renters (ages 20–45)
    - Students, young professionals, or families
    - They want quick access to available rentals and essential information
    - They prefer simple filters and mobile-friendly browsing
3. Clients Looking to Build (ages 30–60)
    - Individuals or businesses planning to construct a property
    - They need reassurance, experience, and a clear process explanation

Identifying website functionalities

- Clear navigation menu
- Allows users to choose between Build, Buy, or Rent easily.
- Property listings with cards
- Each property will be displayed using cards that include an image, price, location, and a call-to-action button.
- Property filters (conceptual)
- Users can filter properties by:
    - Type (apartment, house, commercial)
    - Price range
    - Sale or rent
- Image galleries on property pages
- Helps users visualise the space before enquiring.
- Contact and enquiry forms
- Simple forms with clear labels and minimal required fields to avoid user frustration.

All features will be implemented in a user-friendly way, prioritising simplicity and readability.

Features and visuals from existing websites I would like to include

The website will be inspired by modern real estate and corporate websites that use:

- Card-based layouts for properties
- Minimal colour palettes to maintain professionalism
- Clear call-to-action buttons

Visual inspiration includes:

- Clean typography with good spacing
- Consistent image sizes for property listings
- Simple icons to support text content

These features will help create a modern and trustworthy interface without overwhelming the user.

Pages and their functionalities

- Homepage:
  - Select Your Route (Choose Between Property, Rentals and Construction)
  - Call-to-Action button - Takes you straight to a contact form
- Services Page:
  - Clickable images and text - Will take you to the listings/specific listing depending on what is pressed.
- Property/Rental/Construction Pages:
  - Clickable listings and descriptions - Will take you to that specific listing
- Details Page:
  - Contact Us button - Redirects to the contact form
- Contact Us Page:
  - Contact form - Will have functional type boxes
  - Send button - Redirects back to home page
- About Us Page:
  - No interactive functions

All pages will be scrollable and have an interactable navigation bar and footer.

UI Principles and UX Laws Used

UI Principles:

- Visual hierarchy - Important information such as CTAs and headings are more prominent
- Consistency - Same colours, fonts, and button styles used throughout the site
- Whitespace - Prevents the interface from feeling cluttered

- Typography hierarchy - Clear distinction between headings, body text, and labels

UX Laws:

- Hick's Law - Options are limited to avoid overwhelming users (Build / Buy / Rent)
- Fitts's Law - Buttons are large and easy to click
- Jakob's Law - Navigation and layouts follow familiar website patterns
- Law of Proximity - Related information is grouped together

USER PERSONA 1 – FIRST-TIME PROPERTY BUYER

DANIEL VELLA
AGED 29

Occupation: Software Developer
Location: Malta
Education: University graduate
Tech level: High; uses websites and apps daily

What They Do

Daniel works full-time in the tech industry and is currently looking to buy his first apartment. He spends a lot of time online researching different property options and comparing prices.

Reason for Using the Website (Wants & Needs)

- Browse apartments for sale
- Compare prices and property features
- View images, floor plans, and property descriptions
- Check location information and nearby facilities
- Contact the company to schedule a viewing

He wants a clear and organized website including:

- Prices
- Locations
- Number of bedrooms
- Property types

Frustrations with Existing Websites

- Have too many listings with poor filtering systems
- Display low-quality images
- Provide unclear property descriptions
- Have slow loading times
- Make it difficult to contact agents quickly

Special Needs / Accessibility

- Mobile-friendly websites
- Fast loading pages
- Clear navigation and simple layouts

USER PERSONA 2 - STUDENT LOOKING FOR RENTAL PROPERTY

Occupation: University Student
Location: Malta
Education: Undergraduate student
Tech level: Medium-High

SARAH CAMILLERI
AGED 21

What They Do
Sarah studies at university and is looking for a small rental apartment close to campus.

Reason for Using the Website (Wants & Needs)
- Find affordable rental apartments
- Check monthly rent prices
- View photos of the property
- See distance from university and public transport
- Contact the company to ask questions about renting

She wants a clear and organized website where she can find:
- A quick search system
- Filters for rent price, location, and apartment size
- A simple contact form

Frustrations with Existing Websites
- Show outdated listings
- Do not clearly show monthly costs
- Have too many ads or pop-ups
- Are difficult to use on mobile devices

Special Needs / Accessibility
- Mobile-optimised design
- Simple navigation
- Clear pricing information

USER PERSONA 3 – PROPERTY INVESTOR

Occupation: Business Owner / Investor
Location: Malta
Education: Business degree
Tech level: Medium

MICHAEL BORG
AGED 45

What They Do
Michael owns a small business and invests in property as a long-term financial investment. He regularly looks for new developments or properties to purchase and rent out.

Reason for Using the Website (Wants & Needs)
- Discover new building developments
- View investment opportunities
- Learn about construction projects
- Check property prices and expected returns
- Contact the company for business inquiries

He wants to see:
- A professional-looking website
- Clear project descriptions
- High-quality property images and floor plans
- Information about construction progress and availability

Frustrations with Existing Websites
- Lack details in property descriptions
- Have poor navigation
- Make it difficult to contact developers directly

Special Needs / Accessibility
- Larger readable text
- Clear layouts without clutter
- Easy-to-find contact information
